BC CSR Screening Report

Date generated: 10/12/2026
Site: Demonstration only; assessment mode: both
Sample count: 2. Samples are compared individually; no averaging.
Groundwater used for drinking water: Assumed applicable for this fictional demonstration.
Educational use only. Not professional environmental advice or a formal ESA. Verify current BC CSR requirements and pathway applicability before relying on results.
Dataset: BC Contaminated Sites Regulation — Schedule 3.1; source snapshot: Source tables verified 2026-10-11; consolidation 2026-10-06
Official regulation: https://www.bclaws.gov.bc.ca/civix/document/id/complete/statreg/375_96_00
Schedule 3.1 soil only. Unassessed factors and unsupported conditions prevent a confirmed pass. Source URLs:

Land Use Summary

Current land use: Residential Low Density
Proposed land use: Industrial
Scenarios evaluated: Current: Residential Low Density / Proposed: Industrial
Selected thresholds: Schedule 3.1 soil standards (Parts 1–3)

Results Summary

1 exceedance(s), 4 evaluated scenario comparison(s), 2 scenario comparison(s) requiring review, 1 selected contaminant(s).

Recommendation

One or more evaluated scenario comparisons exceed the selected Schedule 3.1 thresholds. A Detailed Site Investigation may be needed to characterize the location, extent, and degree of contamination. 2 soil scenario(s) have unresolved applicability or source conditions. No confirmed pass is made for those scenarios.
